CLOUDBURST

- Margaret River -

Cloudburst took the Australian wine world by storm, sweeping the trophies in the 2013 Margaret River Wine Show with its inaugural vintage. Going beyond traditional winemaking philosophies, Cloudburst has proven that breaking the rules can yield big results. One of the newest wineries in the Margaret River wine region, first planted in 2005, Cloudburst surpassed many long-established wineries with its exceptional biodynamic wines and now is in high demand amongst collectors and sommeliers around the world.

“I can honestly state that I have never ever tasted a first group of releases from any winery – Australian or from elsewhere – at this level of quality.”
